Public Sector Practice

KEY PERSONNEL:

Mr. Bhojraj Maheepathi heads the Public Sector Practice at Unisoft Solutions Inc.

Mr. Maheepathi has over fifteen years experience in architecting, managing and delivering public enterprise applications for the Commonwealths of Pennsylvania, Virginia and Connecticut.

PRACTICE AREAS

- IT Staff augmentation in Public Enterprise Application and Technologies
- New Business Development, participating in RFPs, Statement Of Work etc.

CUSTOMER/CONSULTING HIGHLIGHTS:

1. Pennsylvania Department of Public Welfare (Dec 1998 to May 2008)

During these years, we are glad to have contributed as the IT organization progressed from a mainframe-centric platform through a client-server environment towards an Enterprise Services Oriented Architecture (ESOA) to support Business Applications.

We were initially engaged to work on the Client Information System in December of 1998. Subsequently, we were engaged to work for the Advanced Technology Competency Section when it was formed the next year where we have been able to make most of our contributions.

We are proud to have prototyped and later deployed to production most of the new technology applications during their infancy at PaDPW.

Listed below are a few of the notable firsts:

- Implemented the XML messaging interface between JNET and DPW in 2000
- Prototyped and implemented Open/OLTP and OpenTI applications to web-enable mainframe services in 2001
- Prototyped the use of BizTalk Server 2000 in 2001
- Developed and implemented web services/SOAP interfaces for the Promise application in 2002
- Involved in selection, installation, administration and maintenances of the webMethods Integration platform since its procurement in 2002
- As per the charter of ATCS when it was formed, our role was also to assist DTE and provide middleware services in support of an n-tier infrastructure. As such, we have been involved in Installation, Upgrade and Administration of the IBM WebSphereMQ MQ server and the webMethods Integration Server platform as well.
